

Marion County Soil and Water Conservation District (SWCD) Rain Barrel Order Form

Black
or
Gray

Economy Rain Barrel Cost = \$75 each

Either of these barrels requires the purchase of a flexible downspout and minimum of 2-3 concrete blocks. On a big rain overflow water may spill around the barrel. Barrel color can be painted. **Additional items** such as the wooden barrel stand (pedestal), Upcycle rain water diverter, etc. can be purchased for an additional amount. Check the website www.UpCycle-Products.com for these other items. Call the Marion County SWCD office at 317-786-1776 for more details and prices.

Standard Rain Barrel Cost = \$100 each

This barrel includes a water saver device to connect directly with your gutter. It allows for overflow water to return to the gutter, so there are no spills around the barrel.

Barrel color may vary (but can be painted) and comes with all items needed except minimum of 2-3 concrete blocks to set barrel on.

To order a rain barrel and required parts to create your own backyard system (minimal assembly will be required) complete the order form below and send with payment to the Marion County SWCD. Connect the rain barrel to your home's downspouts and rain water is stored in the barrel until needed for watering your lawn or flowers. This will help to reduce your monthly water bills in the summer! The system is sealed, so mosquitoes are not a problem. All the rain barrels are made from recycled containers.

Note-Orders due by May 1, 2010

Pick up on May 15, 2010 between 10:00 am to 1:00 pm at Normandy Farms Subdivision Information Center, 7802 Marsh Rd, Indianapolis, IN (located in Northwest Marion County).

Note: A reminder for rain barrel pick up with directions to the pick up site will be sent to those ordering rain barrels in advance of May 15, 2010 date.
