

High Tunnel System Suppliers List

- Below is not a comprehensive list of high tunnel manufacturers.
- When researching high tunnels, compare the material components of the high tunnel systems such as the gauge of steel, distance between hoops, if the hoops are reinforced with trusses, purlins, etc.
- If wind or snow load is an issue/concern, speak with the manufacturers about available wind/snow packages.
- Please refer to the Indiana High Tunnel Handbook for information on selecting a high tunnel for your operation, site selection, construction considerations, etc. [Indiana High Tunnel Handbook - Purdue Extension](#)
- The Marion County SWCD does not show preference to specific businesses. This list is not all inclusive. If you are a high tunnel retailer or supplier and would like to be added to the list, please contact marioncountyswcd@iaswcd.org
